DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see remarks, filed 5/31/07, with respect to the rejection(s) of claim(s) 1-46,48-61 under 35 USC 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made for claims 43-46 and 48-61 in view of 35 USC 112.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 43-46 and 48-61 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The original disclosure supports only a statutory hardware system/method (i.e., mobile communications device) with only a brief mention that such hardware system/method is performed by various combinations of software and hardware (i.e., disclosure mentions the mobile communications device having Ram/ROM and flash memory and microcontroller receiving instructions from the keypad). Hence, the storage medium described in independent claims 43 and 50-55 are not adequately supported in the original disclosure.

Allowable Subject Matter

4. Claims 1-42 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
